FOR IMMEDIATE RELEASE

Pelarious, Inc. Offers Expanded Schedule Of Adobe® CS Training For Creative Professionals

SAINT LOUIS, MO, April 7, 2005 – The Pelarious Professional Skills Development Center announces today an expanded schedule of Adobe® training events with partnering Adobe® Certified Instructor, Rob Daniels. The new schedule includes seminars in Adobe® Acrobat®, GoLive®, Illustrator®, InDesign®, and Photoshop®.

The Pelarious Professional Skills Development Center is the only Adobe® Authorized Training Center in the St. Louis area. The seminar center offers hands-on training for creative professionals using Adobe® products. The training sessions take a real-world, task-oriented approach and are geared toward creative professionals working in the advertising and graphics industries.

“Since adding the Adobe® seminars to our course roster last summer, we’ve educated and energized many individuals and advertising teams in the St. Louis area and across the country,” said Holly Seher, Training Coordinator. “We’re pleased to expand our offerings even further.”

“We know that creative professionals are always under a time-crunch,” said Patrick McGraw, Pelarious Founder and Guru. “By partnering with an experienced instructor, providing comprehensive materials, and creating a comfortable environment, our attendees can get the most from their training days and get right back to work.”

The Pelarious Professional Skills Development Center is located in historic St. Charles, Missouri. The Adobe® seminar schedule is available on the Pelarious website. <<http://www.pelarious.com/seminars/adobeecs.html>>
